MICHAEL NOCITO

SENIOR IMPLEMENTATION ANALYST · DATA MIGRATION & CLIENT ONBOARDING

Glassboro, NJ · 856-375-4371 · hello.michaelnocito@gmail.com · linkedin.com/in/michaelnocito

PROFESSIONAL SUMMARY

Senior Implementation Analyst with 10 years of experience taking enterprise, healthcare, and higher-education clients live on complex software solutions. Specializes in end-to-end data migration, source-to-target mapping, and client UAT. Brings strong AI fluency to easily adopt emerging workflow technologies and streamline data profiling, documentation, and project delivery. Focused on thorough data reconciliation, hands-on client training, and dependable project delivery.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Implementation Lifecycle:** Client Discovery, Workflow Configuration, UAT Management, Go-Live Strategy, Administrator Training, Post-Go-Live Support, Standardized Runbooks
- **Data & Document Migration:** Source-to-Target Mapping, Data Profiling & Cleansing, Control Total Reconciliation, Error Resolution
- **Domain Expertise:** Enterprise Software Implementation, Document Management, Healthcare Compliance, Higher Education
- **Tools & Technologies:** Advanced Excel (Data Profiling, Reconciliation Models), SQL, CRM/Ticketing Workflows, AI Fluency & Workflow Automation

PROFESSIONAL EXPERIENCE

Senior Implementation Analyst — RLDatix (formerly iContracts) | *Moorestown, NJ (2017 – 2025)*

- Successfully owned and delivered complex enterprise software implementations from initial discovery through go-live across healthcare and higher-education verticals, consistently achieving high on-time delivery standards.
- Executed end-to-end data and document migrations, transforming legacy source data into structured target environments with thorough validation and reconciliation.
- Enforced rigorous data governance by reconciling every load against source control totals, row counts, and key coverage, formally resolving and signing off on all discrepancies with clients prior to migration.
- Performed deep legacy system profiling and architected detailed source-to-target mapping models in Excel, applying strong AI fluency to accelerate mapping analysis and eliminate downstream go-live bottlenecks.

- Configured end-to-end client environments—including approval workflows, role-based security permissions, document templates, and pre-built reporting—setting up system capabilities to capture required data prior to go-live.
- Led structured User Acceptance Testing (UAT), trained client administrators and end users at go-live so teams were fully comfortable using the system from day one, and authored standardized implementation runbooks adopted across the delivery team.

Software Support Specialist — Heritage Business Systems | *Moorestown, NJ (2015 – 2017)*

- Technical implementation and deployment of document management software onto client servers and enterprise networks.
- Owned the complete customer rollout lifecycle from pre-installation network discovery and hardware/software scheduling to remote/onsite installation and end-user training.

Financial Sales Consultant — PNC Bank | *Mt. Laurel, NJ (2011 – 2014)*

- Client expectations and project timelines throughout complex lending cycles, rigorously verifying documentation against compliance and fraud-prevention standards.
- Exceeded monthly sales and performance targets across home-equity products while maintaining exceptional customer satisfaction (Gallup service scores).

EDUCATION

Associate of Science in Computer Science — ITT Technical Institute, Bensalem, PA (2004)

PROFESSIONAL DEVELOPMENT

- **Tableau & Data Analysis Coursework** — UNIQUE System Skills (2026)
